

## Web Dev Working Student (m/f/d)

### About us

As a startup dedicated to public transport, our vision is to make buying tickets for passengers as easy as possible. Therefore, we are developing a ticketing system that automatically detects beginning and end of a journey. Based on the detection, it is possible to provide the passenger with the cheapest ticket.

The problems we are trying to solve are both interesting and challenging: developing a reliable ride detection algorithm based on data from smartphone sensors while creating a solution that attracts both passengers and public transport providers.

We value active collaboration and independent work. We believe that together we can build a great solution that will have a major impact on public transport.

### Responsibilities

- Develop a web dashboard using vue.js
- Design a dashboard and brainstorm about how to visualize useful data that is generated during rides with public vehicles
- Maintain our dashboard and make sure that it displays relevant data to our customers
- Implement new features for our customers
- Contribute your own ideas to the dashboard

### Your profile

- In-depth expertise in vue.js
- Experience in web development
- Studying computer science, engineering or similar
- Interest to learn new programming languages as needed

### Bonus skills

- Experience with AWS
- Experience with test deployment (CI/CD)
- Knowledge in Go
- Advanced skills with Flutter or mobile development

### Benefits

 Flexible working hours

 Up-to-date tech stack

 Couch & plants in the office

 Freedom to contribute and implement your own ideas

 Fair and negotiable remuneration

 Free fruits & snacks

 Challenging and exciting tasks

 Flat hierarchies
